

MARINE CONSTRUCTION GRAPPLES

Bateman delivers high-performance solutions for dredging and marine construction. From clamshell buckets to heavy-duty rock grapples, our attachments are built to perform in the toughest marine environments.

**B4TRT****4 TINE ROCK/ARMOR
STONE GRAPPLE**

Designed to handle stone up to 30 ton.

Robust four-tine design optimized for secure gripping and efficient movement of bulky, uneven materials.

**B5T2-300RT****5 TINE ROTATING ROCK GRAPPLE**

Designed to handle stone up to 10 ton.

**BPG200RT****LANDSCAPING ROCK GRAPPLE**

Designed to handle stone up to 20 ton.

**B5TD-600RT****SHIPS GEAR**

Diesel drive remote operated rock grapple for mobile cranes or ships gear.

Tier 4 - 70hp ranging from 5 yd³ to 10 yd³ capacity.

MARINE CONSTRUCTION GRAPPLES

CLAMSHELL

Ideal for sand, gravel and rip rap.

Heavy-duty bearing rotators.

High-abrasion resistant alloy steel on leading edges.

Bolt-on edges for extra wear.

LEVEL CUT CLAMSHELL

Designed for dredging where a precise "level cut" is required.

Reinforced bucket design for maximum strength.

Purpose-built to remove sediment only.
